

Installation

The Tru-Lok lid and extension tubes require some assembly as explained in the steps below.

- Rotate lid opener so that bottom bracket is centered over the roof deck seam that aligns with the leg to be used for the lid tube. Tighten bolt on lid locking collar securely. If the lid opener has a latch on the front, remove it to enable the tru-lok kit to function.
- Unfasten 5/16 x 3 bolt and two closest #010643 5/16 x 3/4 bolts (four for the 40Deg Roof) on the #500655 lid bracket. Assemble left top plate and right top plate to it, reusing the hardware. Tighten bolts securely.
- 3. Fasten roof deck tube between top holes in both lid hinge plates with #010649 5/16" x 1-3/4" hex bolt and locknut. Do not overtighten bolt, tube must move freely.
- 4. Assemble #500709 pivot plate bracket to #500710 back-up plate with #010643 5/16" x 3/4" bolt and locknut thru bottom holes as shown above. To assemble pivot plate to bin remove (3) bin bolts from holes in roof deck & hopper seam in line with roof deck seam aligned with lid hinge bracket. Re-use bin bolts to attach bracket to bin.
- 5. Assemble side marked "TOP" of (2) #500704 pivot plates to end of roof deck tube with #010649 5/16" x 1-3/4" bolt and locknut. Assemble bottom side of pivot plates to the pivot plate bracket with (2) #010643 bolts and locknuts. Bolt heads go on inside of plates. Refer to drawing. Do not overtighten bolts, pivot plates need to move freely.
- 6. Fasten top #500729 tube extensions to pivot plates with (1) #010649 bolt and locknut per tube. Use same hardware to fasten additional extension tubes and #500226 basic tube. Tubes can be assembled as bin is built.
- 7. Place #500257 pinch handle assembly on bin leg approximately 40" from bottom of bin and fasten with (2) #500719 clips and (2) #010649 bolts and locknuts.

Exact height can be adjusted for your comfort after bin is erect.

- 8. Slide #500230 tube handle over bottom of tube and place tube thru pinch handle. Close lid and secure handle approximately 40" above pinch handle with #011434 1/4" x 1" carriage bolt and #010943 wing nut.
- 9. Wet inside of rubber handle grip and slide over handle.
